DETAILED ACTION

Applicants amendment of the specification and claims 36, and 38-41, as well as cancellation of claims 37 and 42 is acknowledged. Claims 36, 38-41 and 43 are at issue and are present for examination.

Applicants' arguments filed on 10/2/2001, paper No. 14, have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

Claim Objections

Claims 39 and 40 are objected to because of the following informalities: Claims 39 and 40 are dependent on rejected claims 36 and 38. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 36, 38, 41 and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brisson-Noel et al. (Antimicrobial Agents and Chemotherapy 34(5): 924-927, May 1990).

The rejection is stated in the previous office actions.

Applicants traverse this rejection on the basis that the Brisson-Noel et al. reference is not by another and is the inventors own work. Applicants submit a declaration stating that the coauthors Anne-Brisson Noel and Roland Leclercq of the reference "merely carried out assignments and worked under the supervision and control of one or all of the inventors of the subject invention". Additionally, applicants submit that besides the inventors listed in paragraph 2 of the declaration, Michel Arthur is also a joint-inventor of the subject application. Applicants statements regarding the removal of Anne-Brisson Noel and Roland Leclercq is persuasive, although applicants submission regarding Michel Arthur is not because applicants have not explained why Michel Arthur was left out of the earlier reference or his relationship to the subject application. Thus the rejection over Brisson-Noel et al. is maintained until which time the declaration is corrected.
